INCARNEZ L'ELU DE VOTRE CLAN !

In Rivals, players survive in WildTech, a degenerative arena.

Your goal: save your clan by winning!

You have 2 options:

- Be the last survivor,
- Be the first player to score 5 Rivals Points.

A game is divided into 3 Eras, each made up of several Rounds, themselves divided into 2 Turns.

Each turn, you'll have 2 action points at your disposal, enabling you to:

- Interact with the WildTech by moving, exploring or gathering resources, new cards or anticipation which you need to defend yourself.
- Play cards from your Deck.

Once the 2 Turns are over, part of the WildTech dematerializes, announcing the end of the Round, and players continue their adventures until the winner is announced.

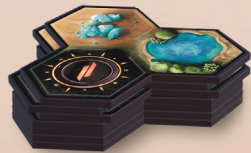

**Play as a character with unique abilities!
Discover a new arena every time you play!**

**Stay on the move, optimize your equipment
and interact with the arena to gather new resources
and develop your skills!**

MATERIAL

POUR LA WILDTECH

36 trigon tiles

6 long tiles

1 central tile

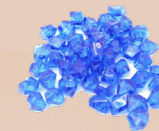

10 Drought tokens

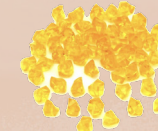

1 6-sided dice

8 success dices

50 Crystals

50 Résins

6 Sponsor tokens

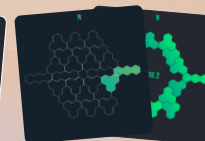

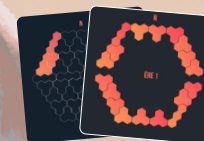

170 Interface cards

19 Schéma cards

15 Event cards

18 Zone cards

POUR LES JOUEURS

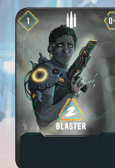

6 Plateaux Ashaks

12 Guild Cards

12 Psywave Cards

18 Blaster Cards

12 Ashaks Cards

2 drones boards & tokens

6 Tokens Ashak

1er player token

18 markers

12 shields

18 Anticipations tokens

SET-UP

I. Generate the Wildtech (the arena) by placing the tiles as shown in the image opposite, with the Volcano tile «N» facing north.
Pay attention to the position of the long tiles!
Place all the tiles first, then turn over those corresponding to the visible starting positions.

II. Each player chooses their Ashak (Hero) and gets the associated board, Ashak cards, shields and token.

Deal 2 Psywave cards and 3 Blaster cards to each player, who shuffles them with his Ashak cards and places them face-down on his Deck slot.

Place three markers in the gauges on the Ashak tray:

- on 20 for the Life Point bar
- 0 for Ultimate bar
- 0 for Rivals Points

III. Deal 2 Guild cards to each player, who places the one of his choice on the Guild slot of his Ashak board and returns the other to the box.

IV. Shuffle all Zone cards from Era III to form a stack of Zone cards.
Shuffle all Zone cards from Era II and place them on the Zone card pile.
Repeat for Era I. (p.19)

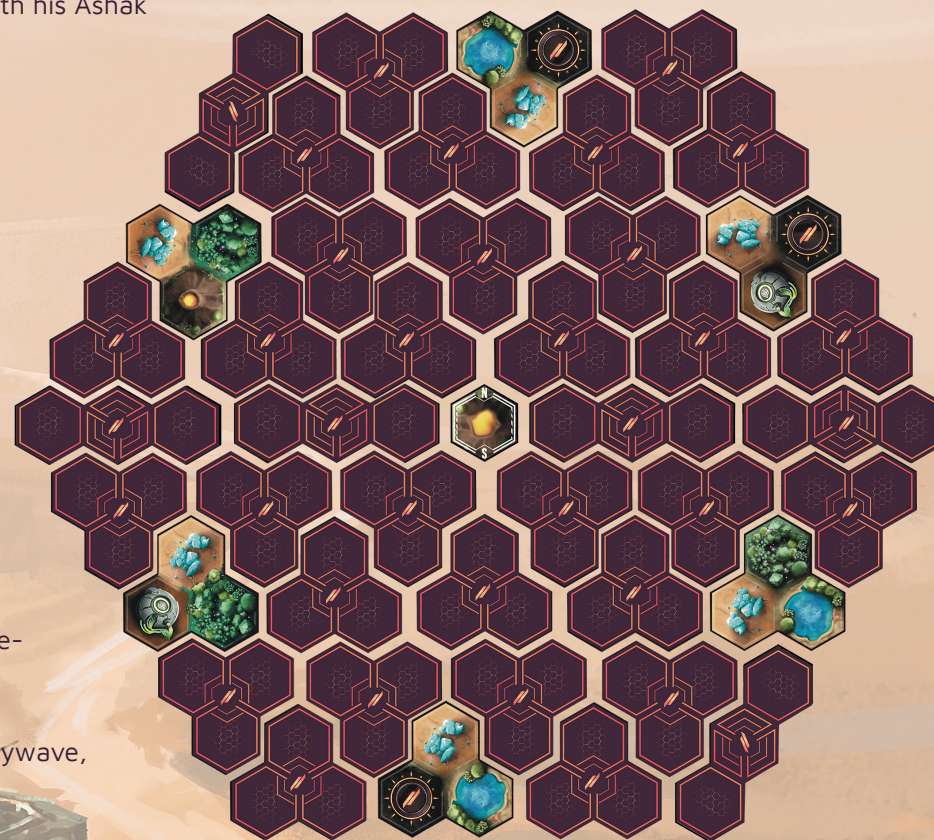

V. Shuffle the Event cards to form the Event deck.

VI. Shuffle the Schemas cards to form the Schemas deck. Place 2 Schemas face-up next to the deck (p.14).

VII. Form a common Interface deck with all remaining cards (except Blaster, Psywave, Ashak and Guild cards) and place 2 cards face-up.

VIII. The last player to win a Battle Royal receives the 1st player token.

IX. Starting with the 1st player and moving clockwise, each player chooses a hex on one of the 6 visible tiles and places his Ashak token there. Ashak cannot be placed on an occupied tile or on the central tile.

DEROULE D'UNE MANCHE

1

Players draw the first 4 cards of their Deck to start the round. If their Deck is empty, they take their discard pile, shuffle it and reconstitute their Deck. They then draw the missing cards to complete their hand.

2

Players take it in turns to spend **2 ACTION POINTS** per turn. A round consists of 2 turns.

2 AP / TURN
2 TURNS

3

Players discard their hands. The 1st player token rotates clockwise. If only 2 players remain, the player with the fewest health points takes the 1st player token.

4

The Zones cards for the current round are drawn and the designated tiles are removed from the Wildtech. p.19.

5

2 new Sponsors appear in the Wildtech. If there are already 3 Sponsors in the Wildtech, skip this step. p.19.

6

Desert-facing Drought tokens are turned over. The growths are removed from the map. p.8.

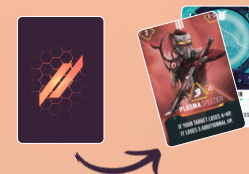

7

A new event card is revealed, replacing the old one.

8

The 2 visible Interface cards are discarded and replaced by 2 new ones.

9

Used Guild and Skill cards are right-side up on the player boards.

ACTIONS

In Rivals, the game is divided into 3 eras, each of which is divided into two rounds.
During his turn, the player has **2 ACTION POINTS.**

EXPLORE p.6  **AP**

MOVE p.6  **AP**

COLLECT p.6-7-8  **AP**

TRADE WITH A SPONSOR p.8  **AP**

SPEND RESSOURCES p.9  **AP**

PLAY A CARD p.11  **AP**

USE ULTIMATE p.17  **AP**

BEGINNING OF THE GAME

Once players and materials are set up, the first player places himself on the Wiltech. Players position themselves (clockwise), taking care not to place themselves in the center of the Wildtech (Volcano tile) or on an already-occupied tile.

The 1st player then begins his 1st turn, using his 2 action points.

This turn often consists of a series of actions such as the following:

Collect **1PA**
Explore **0PA**
Move **1PA**
Play Ashak cards **0PA**

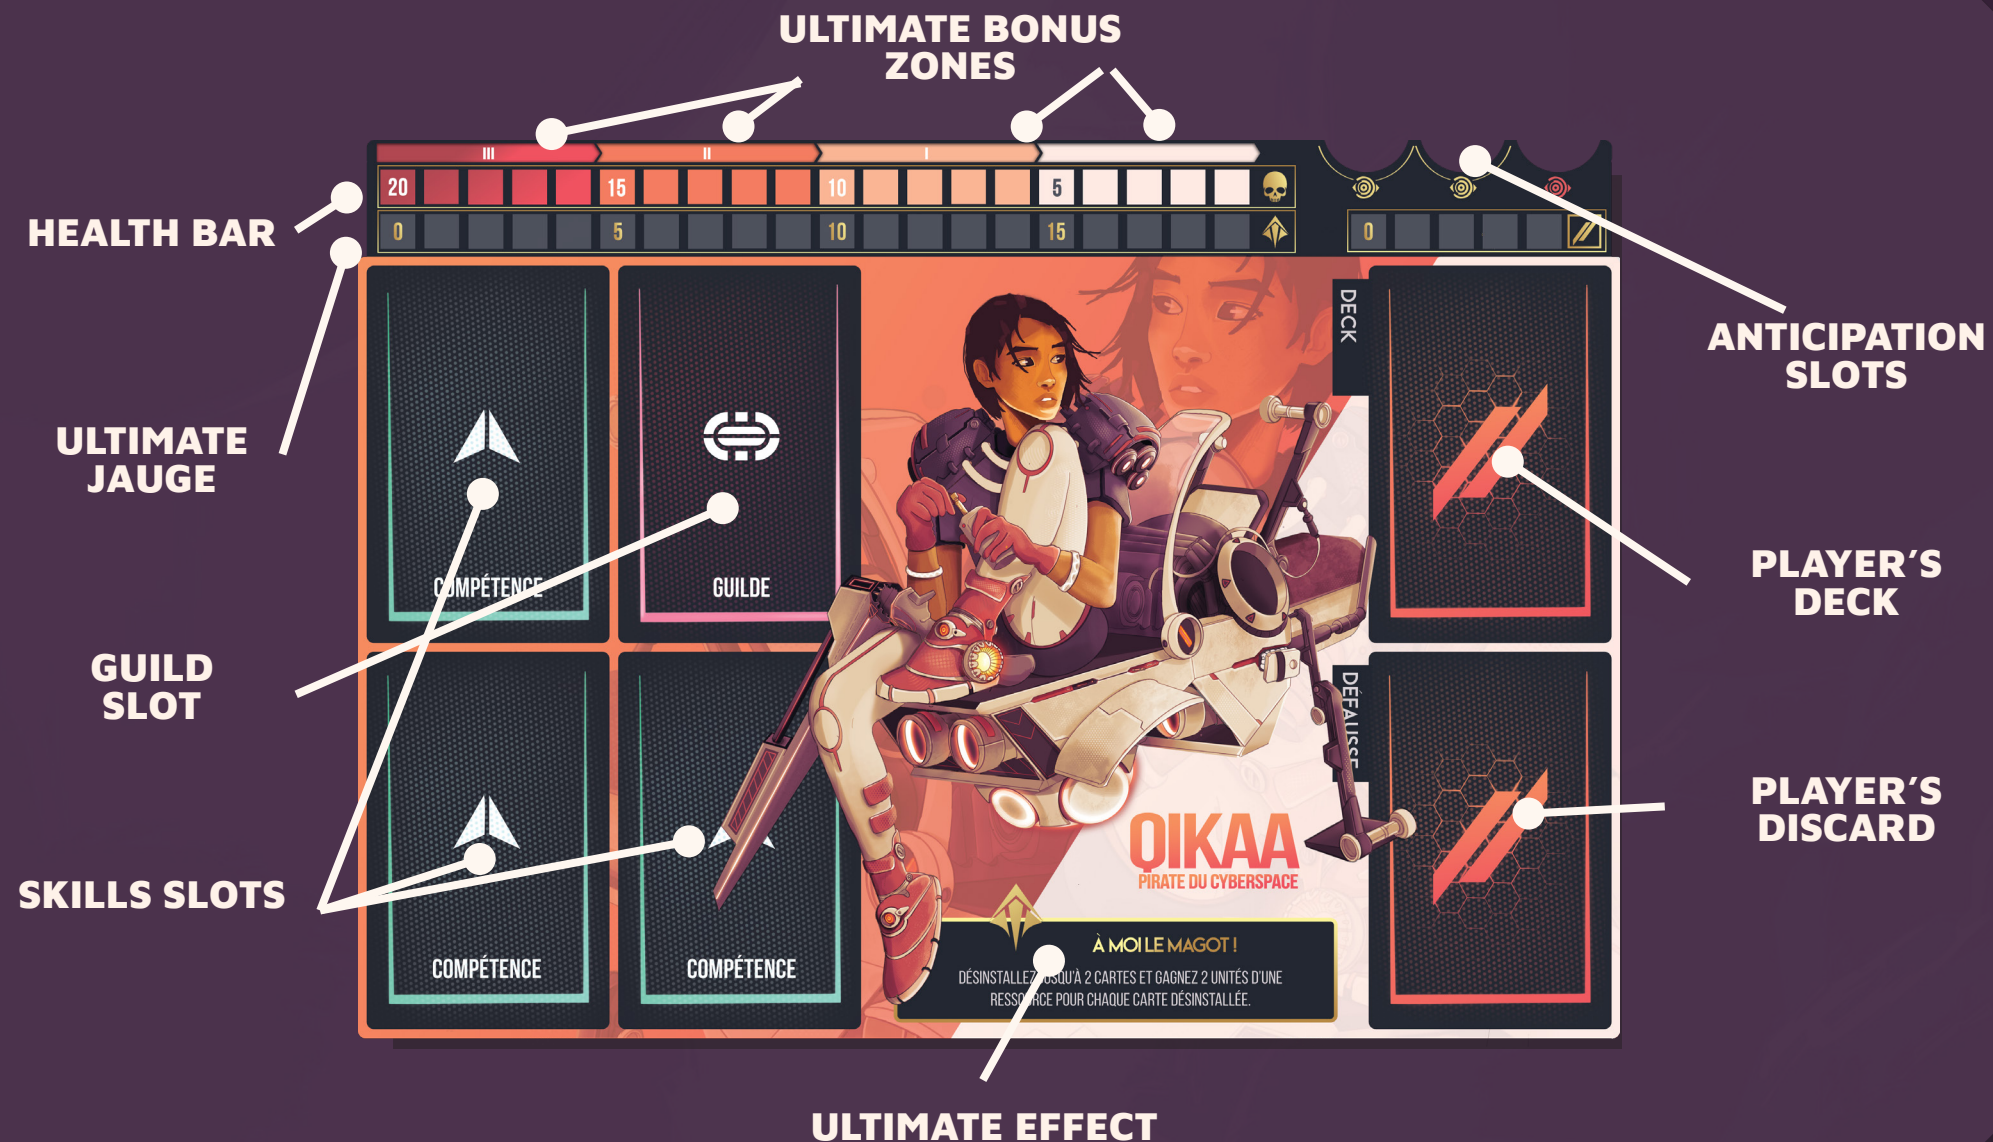

No attack cards can be played during the 1st game round, to give players time to prepare their backs.

The 2nd round is played in the same way as the first, then the end of the round begins (p.19).

At the end of each round, the 1st player token passes to the player on the left.

ANATOMY OF A PLAYER BOARD

A true player's identity card, the boards let you know the current state of your Ashak and your opponents. From their life to their defense, not forgetting their skills, observe the player boards carefully to define your objectives and adapt your strategy!

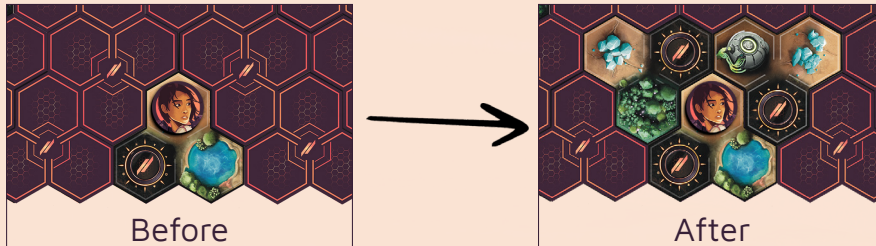

THE WILDTECH

0AP

EXPLORE FREE

The player reveals FREE of charge the tiles adjacent to the hex where he is.
It is possible to reveal only selected tiles.

1AP

MOVE - 1ACTION POINT

The player can move up to two hexes.

If the player wishes to cross an unknown tile, he must interrupt his movement to explore the tile.
He can then spend 1 AP to move again.

Xhan spends 1 AP and moves up to 2 hexes in the direction of his choice.

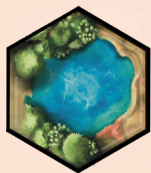

1AP

COLLECT - 1ACTION POINT

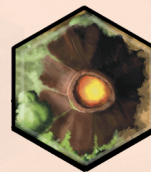

The player collects all resources, anticipation tokens and Interface cards from the tile he is on, and gains a bonus on his hex.

The Collect action systematically generates a drought token.

LAKES

Lakes do not provide any resources.
If you cross or are moved into a lake, for whatever reason, you lose 2 Life Points and remain on the lake until your next move.

VOLCANOS

Volcanos don't provide any resources.
It is possible to cross them and build a shield.

THE WILDTECH

THE VOID

The Void is the area outside Wildtech.

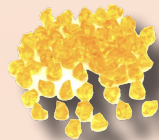

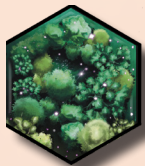

A player who falls in the Void loses 4 HP and replaces himself on a hex adjacent to the Void.
If he decides to reappear on an unrevealed tile, he chooses his arrival hex and turns the tile over to place himself there.

If a player loses the game by falling into the Void, the Rivals Points from his death do not accrue to anyone else.

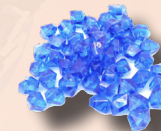

COLLECT RESOURCES

When collecting on a tile containing a Resin or Crystal hex, get 1 resource (which you store on your Ashak tray) for each resource hex on the tile.

FOREST HEX

If you collect while standing on a Resin or Crystal hex, get 3 resources from the hex

CRYSTAL HEX

FOREST BONUS

The player adds one die to his defence rolls as long as he is on the Forest hex.
A dry Forest hex does not cancel the effect of Forest hex coverage.
If the Fire event is active during the round, the Forest hex coverage bonus is lost for that round.

CONSULT INTERFACE

WHEN COLLECTING ON AN INTERFACE TILE,
CONSULT 2 Interface cards.

The 2 visible cards OR the 2 cards on top of the Interface.

PLACE the chosen card in your hand and discard the other.
You can keep neither and discard both.

BONUS if you collect on the Interface hex:

CONSULT 4 Interface cards.

The 2 visible cards and the 2 top cards from the deck
OR the 4 Interface top cards.
Players can add up to 2 cards to their hand.

TRADE WITH A SPONSOR

When a player is on a hex with a Sponsor, he spends 1 Action Point and 1 Anticipation Chit to trade with a Sponsor. He earns 1 Rivals Point and chooses one of the following bonuses:

Install a schema
Fill his anticipation slots
Uninstall 2 cards from hand or discard pile

This action neither harvests nor drains the tile.

COLLECT AN OBSERVATORY

When harvesting on a tile with an Observatory hex, against 2 resources of your choice (2 Resins, 2 Crystals or 1 Crystal and 1 Resin), earn 1 anticipation token.

You can repeat this action until your anticipation gauge is filled (p.17).

If you collect while on an Observatory hex, the 1st Anticipation token is free.

DROUGHT

1

The Ashak on the hex picks up the tile and places a drought token.

2

The drought token is on the desert side for the entire current round.

3

At the start of the new round, the drought token is flipped to its plant side. It is still impossible to collect the tile this round.

4

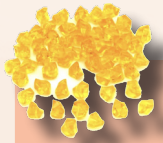

In the new round, the drought token is removed from the board and the tile can be collected again.

SPEND RESOURCES

DOES NOT COST ACTION POINTS.

(This action is only available ON YOUR TURN)

CREATE A SHIELD

Spend **2 resins** to create a shield that absorbs 1 burst of physical or mental damage of any amount. Once the attack has been taken, the shield is destroyed.

An Ashak can build up to 2 shields.
If he wishes to build a 3rd, he chooses one and destroys it to create a new one.

There can only be one shield per hex.

An allied shield does not block line-of-sight or slow down the movement action.

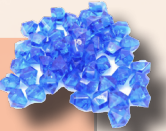

Entering a square with an enemy shield will cost you 2 squares of movement.

UNINSTALL A CARD

Spend 2 crystals and uninstall 1 card from your hand OR your discard pile.

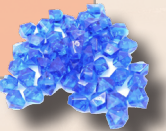

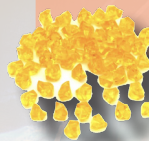

If you uninstall from your hand, draw 1 card.

INSTALL A SCHEMA

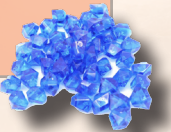

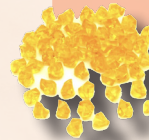

Spend 5 identical resources and install 1 of the visible schemas OR the 1st from the deck.

Install: add a card to your Deck, the card arrives in the player's hand.

SCORE A RIVALS POINT

Spend 10 identical resources and score a Rivals Point.

CARDS

ANATOMY OF A CARD

The cards in your Deck represent your Ashak's weapons, techniques and experience.

Create the best possible combinations, based on what you find throughout the game!

There are 3 types of card: skills, tactics and attacks.

Card costs vary from **0AP** to **2AP**.

You can earn cards by consulting the Interface, buying Schemas or when you eliminate a player.

?AP

PLAY CARD ?ACTION POINT

For each card you play, refer to the value shown in the diamond at top left, as shown opposite, to find out the cost of your card.

Pay the cost and apply the effect. Once applied, discard the card in the «discard» slot on your Ashak board.

CARD RESOLUTION

When you play a card, if it triggers an opponent's response, resolve the cards from the last one played to the first.

CARDS TYPE

ATTACKS

Attack cards are the weapons and techniques you use to injure your opponents.

They have an X-Y range which indicates the different hexes in which the card's target must be located (minimum X, maximum Y).

Mentals

They ignore lines of sight and have an additional effect that can be activated by discarding a card from your hand when you play them.

You can only discard one card per mental.

Physicals

Only cards that can be reinforced with one or more Mod cards. If the Attack performs several salvos, each salvo benefits from the added Mods and any damage bonuses.

Explosives

These cards have damage and area effects that apply to the entire tile in the targeted hex.

They affect ALL targets on the tile, including you, and destroy both allied and enemy shields. After use, these cards are uninstalled.

In return, you must install the top card of the Interface.

SKILLS

Skill cards reflect your combat experience.

Pay its action cost, then place it on your character board.

You are limited to 3 Skill cards on your character board. If you play a 4th Skill card, uninstall and replace one of your own with the new one. You can only possess the same Skill card once.

There are 2 types of Skill.

Passives

Once the cost has been paid, the card is placed on the player's board. Its effect is immediate and permanent.

Activables

When you place an active skill, it is upside down until the end of the round.

When you use it, place it upside down to signify that it is exhausted until the end of that round.

At the end of the round, put it back upside down to use it again.

TACTICALS

Tactical cards represent your defensive abilities and combat techniques.

When played, apply their effects then place them in your personal discard pile.

There are three types of Tactical card:

Mods

Increase the power of physical attacks.

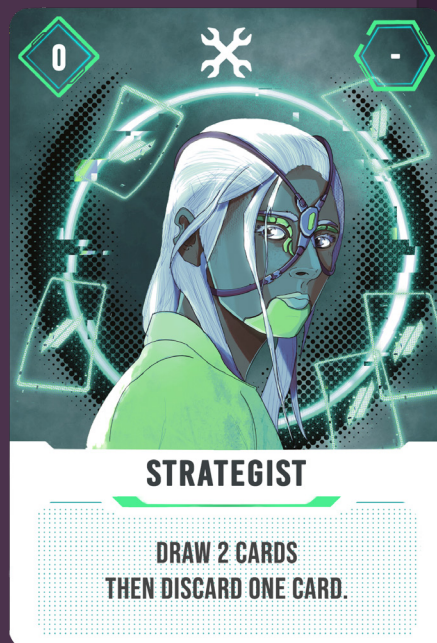

Defences

To obtain Anticipation, recover HPs and create shields.

Utilities

Can be played at any time.

0AP

ASHAK CARDS

Each player receives the cards associated with the chosen Ashak board. Playing an Ashak card costs no **ACTION POINTS**.

GUILDS

Each player receives 2 Guild cards and keeps one of them which he places on the Guild slot on his board.

Guild cards do not cost **ACTION POINTS** and can be used once per round during a player's turn.

Guild cards cannot be uninstalled.

PLAYABLE
ONCE PER RUN

GUILD SYMBOL

CARD NAME
AND EFFECT

RARITY

In addition to their type, cards have a rarity indicating the number of examples present in the Interface.

Rarity is represented by underlining the card name.

All cards outside the Interface are unique.

Schema, Character, Guild, Event and Zone cards are not included.

Common cards - 4 copies

Uncommon cards - 3 copies

Rare cards - 2 copies

SCHEMAS

Schemas are powerful and unique cards, recognizable by their golden appearance.

ON YOUR TURN:

SPEND 5 IDENTICAL RESOURCES (crystals ou resins)

OR

Trade with a Sponsor

To install one of the visible schemas

OR the first face-down.

FIGHTS

Combat begins when a player plays an attack card or his Ultimate. The player pays the action point cost of the card and applies its effect to the target, which can react to it in various ways.

When attacking, players check that the card's range and the target's distance match, and that the line of sight is clear (see p.18).

THE STRIKER

Pay the cost of your action (in Action Points or Ultimate Point) and announces the damage he is attempting to inflict on his target and any effects associated with his action.

the attacker attacks 2 times with 3 damage.

VS

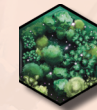

THE DEFENDER

Rolls defence dice to partially or totally reduce the attack's damage. Each Ashak has 2 basic Defence dice, which can be increased by Anticipation.

2 Permanent Success dice

DEFENCE OPTIONS

FORESTS

+1 defence die

ANTICIPATION TOKENS

SHIELDS

Absorb a burst of damage

UTILITARIES CARDS

Can be played outside your turn

RESOLUTION

When a player counters an attack with another card, the last card played is resolved to the attacking card. (stack resolution).

ELIMINATION

When a player eliminates another player thanks to one of his actions, he instantly gains 2 Rivals Points and can install a card from the opponent's deck in his hand (excluding Guild and Character cards).

ANTICIPATION TOKENS

Anticipation increases defence dice rolls.

A player has 2 basic dice.

For each Anticipation token activated, the player gains 2 additional dice until the start of his next turn. You can activate up to 2 Anticipation tokens simultaneously.

A player activates his token by turning it over on the «+2» phase

The 3rd anticipation slot is a reserve which replaces an activated token that is discarded at the start of the turn.

Players start the game without anticipation.

The player who uses his 2 Anticipation tokens goes from 2 defence dice to 6.

REMINDER

Players obtain Anticipation through their cards, by collecting from a Laboratory and by trading with a Sponsor.

ULTIMATE

A player's Ultimate gauge fills up every time he injures an opponent. For each HP lost, the attacker fills his gauge by 1 point, to which he adds a bonus according to the number of HP his target possessed before the attack.

A player in the 16-20 HP range will contribute a bonus of 3pts of Ultimate in addition to the damage to his opponent.

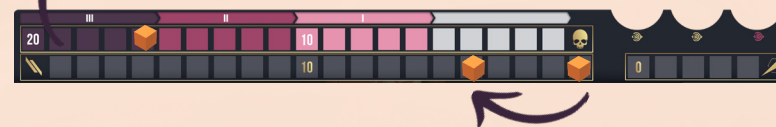

For salvo attacks, the bonus is recalculated for each salvo.

Once the gauge is full, the player can use his Ultimate during his turn. The gauge returns to 0 and the player can charge it again.

Damage caused by an Ultimate fills the Ultimate gauge.

Each player starts the game with an empty Ultimate gauge.

An opponent who attacks a player with 16 HP charges his Ultimate with 3 bonus points in addition to 1 point per HP

If I attack an opponent with 18 HP, injuring him by 1 HP, I increase my gauge by 1 point + 3 bonus points.

If I attack my opponent with a Double Blaster (2 bursts of 2 damage) and inflict 1 HP then 1 HP, I increase my gauge by 1 point + 3 bonus points for the first burst, then by 1 point + 2 bonus points since my opponent will have passed into zone II of the Ultimate bonus.

RANGE AND LINES OF SIGHT

The line of sight from one player to another is blocked if the shortest path from the thrower's hex to the target's hex crosses :

/// A hex with an enemy

/// A shield not belonging to the attacker

SPECIAL CASES

Explosive and mental cards are not affected by lines of sight.

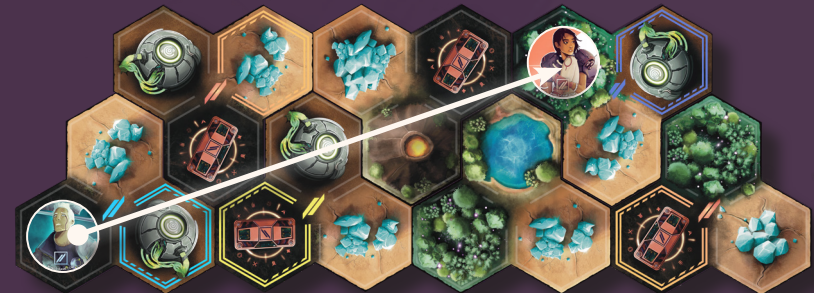

It is possible to target through a tile that has not yet been revealed.

EXAMPLES

Atmos attacks for 2 Action Points with its Sniper card at 6 damage instead of the standard 4. With the card's range from 3 to 7 hexes, he can target **Qikaa**.

Qikaa must defend herself from the 6 Sniper damage.

She uses 1 anticipation token and adds 2 more dice to her roll.

Each player has 2 basic dice.

In addition, she benefits from 1 extra dice per throw because she is on a Forest hex.

In total, she has 5 dice to defend herself from the Sniper, which she keeps until the start of her next turn, when she discards all her dice. of her next turn, when she discards the used anticipation token.

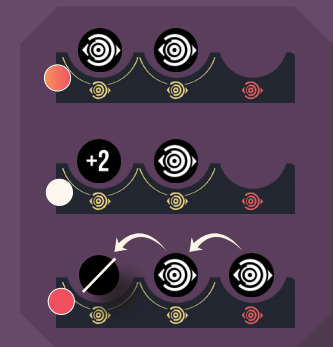

Before the attack, Qikaa has 2 anticipation tokens. ●

During the attack, she flips a token to gain 2 dice on her roll. ●

Until her next turn, her flipped token grants her 2 additional dice.

At the start of her turn, she discards the returned anticipation token (+2). ●

If she has a reserve token, it fills the gap left by the discarded token.

Atmos attacks Qikaa with a Blaster or a Psywave. As it is in her shield, the Physical or Mental card destroys it, resolving the attack.

If Atmos attacks with an Explosive card, the shield is destroyed AND Qikaa defends herself from the damage of the attack.

1. In this example, Xhan attacks with a Blaster from Qikaa's shield targeting her. Qikaa defends normally.
2. Qikaa can attack Xhan directly, since he is inside an allied shield.
3. Qikaa and Atmos cannot attack each other with Physical cards since their line of sight is blocked by Xhan for Qikaa and by Xhan and Qikaa's shield for Atmos.
4. If Qikaa attacks one of its opponents with an Explosive card, the latter destroys the shield AND inflicts damage on Atmos and Xhan who must defend themselves from the attack, which affects the entire tile.

END OF ROUND

ERAS & ROUNDS

At the end of each round, players draw zone cards to see which tiles have disappeared into the Void.

Rounds are divided as follows:

Era I (1st crown) : 2 visible schemas

- turn 2 : 1 Zone card,
- turn 3 : 2 Zone cards,
- turn 4 : 3 Zone cards.

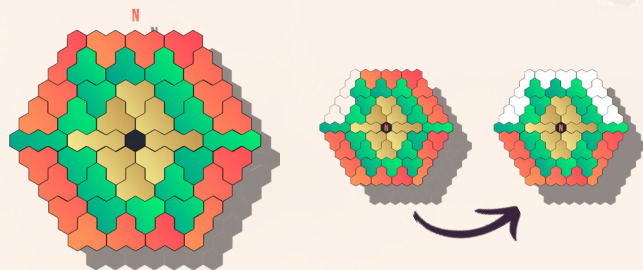

Era II (2nd crown) : 3 visible schemas

- turn 1 to 4 : 2 Zone cards.

Era III (3rd crown) : 4 visible schemas

- turn 1 to 4 : 1 Zone card.

Round 2 to 3 of Era 1.

At the end of this round, all the orange tiles (era 1) will have disappeared. Players move on to Round 1 of Era 2, discarding the 2 visible schematic cards and replacing them with 3 new ones.

SPONSOR GENERATION

From the 2nd round onwards, the 1st Sponsor appears on the central hex.

From round 3 onwards, Sponsors are generated by 2 rolls of the dice before the players' draw phase announcing the new round.

Roll the Sponsor die (8 colors) and check that one of the revealed landing points corresponds to the color obtained.

If there are several landing points of the same color, roll the 6-sided die to determine the Sponsor's location.

If there are 2 areas of the same color:

- from 1 to 3, the Sponsor lands on the northernmost zone,
- from 4 to 6 on the southernmost zone.

If there are 3 identical zones, proceed in the same way dividing the die into 3.

If the zones are on the same axis, West wins over East.

Sponsor appearance hex

Sponsor dice

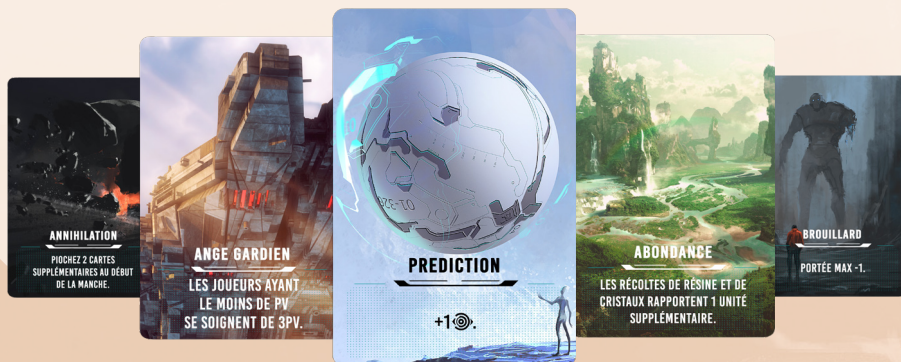

When only 2 players remain, Sponsors are no longer generated.

Duelists can still trade with the remaining Sponsors.

ÉVÉNEMENTS

A partir de la deuxième manche, avant l'apparition des Sponsors, une carte événement est tirée pour impacter la manche à venir.

Selon la carte, l'effet est immédiat ou différé.

INTERFACE

At the end of each round, the 2 visible Interface cards are discarded and replaced by the first 2 from the Deck.

SCHEMAS

At the end of each era, visible Schemas are discarded and replaced by new ones, to which an additional card is added.

- Era 1: 2 visible Schemas.
- Era 2: 3 visible Schemas.
- Era 3: 4 visible Schemas.

RESTORING

Guild & Skill cards used during the round are reset and can be used again. This phase also applies to Active Skills played during the round.

DROUGHT

Drought tokens are returned or removed from the Wildtech, p.8.

1ST PLAYER CHANGEOVER

At the end of each round, the 1st player token rotates clockwise clockwise.

Anticipating this point to avoid finding yourself defenseless for an entire round!

When only 2 players remain, at the end of each round, the 1st player token is given to the player with the fewest Health Points.

ENDGAME

When there is only one Ashak left on the board,
that Ashak wins.

It is also possible to achieve an early victory
as soon as a player has 5 Rivals Points.

3 ways to earn Rivals Points:

**2 Points when you eliminate
an Ashak**

**1 Point when you spend
10 units of the same resource**

1 Point per Sponsor traded

If no player has won
when the last zone card is drawn.

A final round begins, at the end of which the player with the
most Rivals Points is declared the winner.

W.I.P

SPECIAL RULES

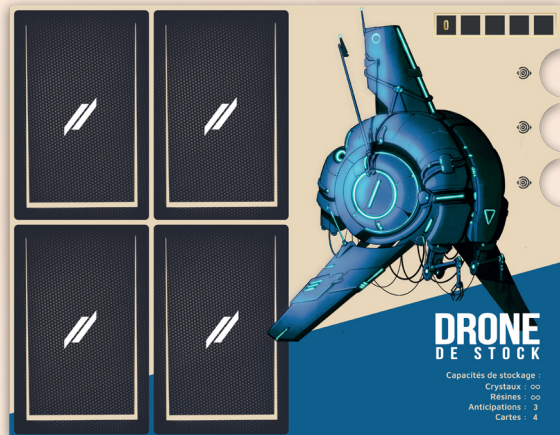

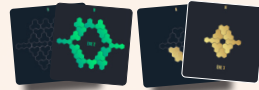

W.I.P

DRONE MODE 2-PLAYER VARIANT

SETUP

Game setup is identical, except for the following points:

- Remove all Era 1 tiles, except for the 6 usual starting locations (see diagram opposite).
- Remove all Zone cards from Era 1.
- Deal each player a Drone board and a Drone counter of the same color.
- The first player places his Character counter on the tile of his choice, then his Drone counter on the same tile (but not necessarily on the same hex).
- Then the 2nd player does the same.

W.I.P

DRONE ACTION

Drones have 2 AP and can perform the same actions as Ashaks except Play a card.

When a Drone collects cards via a Collect action, it must store them in one of the free slots in its inventory.

If it no longer has any, it can no longer recover new cards.

For 1 AP, Drones can carry out a 1-damage attack (target defends normally).

STORAGE AND TRADING

Drones have 3 card storage slots (visible), 2 Anticipation storage slots. They can also carry as many resources and Point Rivals as required.

During an Ashak turn, if the player is within 1 hex of his Drone, he can trade with it free of charge to :

- recover cards from the Drone or give cards from his hand
- take as many resources from the Drone as they wish
- recover any Rivals points on the Drone
- take all or part of the Drone's Anticipation tokens

HACKING AND FIGHTING

An Ashak can hack an opponent's Drone for 1 AP with a range of 0 to 2. He rolls 3 dice, and each success allows him to perform one of the following two actions:

- Steal the contents of a Drone slot, i.e. either a card
all Rivals resources and points,
or all Anticipation tokens.
- Perform a basic action at a cost of 1 AP.

Drones have no hit points and therefore cannot be destroyed. However, you can attack a Drone to apply the effect of an Attack card.

REMINDER

At the start of a round, the 1st player token goes to the player with the fewest HP. In the event of a tie, the token does not change player.

LEXICON

Ashak: the Hero embodied by the player.

Spend: pay the cost of the action, in action points or resources.

Uninstall: remove a card from your deck.

Era: game time corresponding to the number of rounds required for the tiles adjacent to the Void to disappear.

Install: add a card to your hand.

Trade with a Sponsor: action of paying 1 action point and 1 anticipation point on the same Sponsor hex to benefit from the advantages.

Round: corresponds to 2 turns of 2 action points between two zone removal phases.

Point Rivals: victory point.

Collect: action of draining the tile on which you are standing to obtain resources.

Redress: action of reusing an active skill or guild card already in use.

Resource: crystal or resin.

Turn: time when the player can play his action points and spend his resources.

Zone: set of tiles (2 or 3 tiles) belonging to an era defined by its location on the Wiltech. Era I corresponds to the tiles adjacent to the Void at the start of the game (with the exception of the two long tiles leading to the central square).
